

An Introduction to Human Geography: Issues for the 21st Century (3rd Edition)

Comprehensively revised, the third edition of this widely used text provides a global overview of the major topics within human geography and is an essential textbook for undergraduate students taking courses in geography and related disciplines. Features: Full colour presentation brings out the vitality and colour of the people and places. Re-enforced social, cultural and environmental coverage. More critical coverage and greater currency with the latest controversies, debates and hot topics. More on key phenomena in 21st century life - the social production of nature, global production networks, service economies and the second global shift. An innovative website supports the text at www.booksites.net/daniels. A continued range of pedagogical features that help clarify, extend and apply understanding, including Spotlight boxes that provide deeper analysis of a key topic or concept, and Thematic case studies that illustrate a real-world theme or example.
