

# Inflation, Open Economies and resources: The Collected Writings of Paul Davidson, Vol. 2

Paul Davidson is one of Americas most prolific academic economists. Editor of the Journal of Post-Keynesian Economics and holder of the Holly chair of Excellence at the University of Tennessee, Professor Davidson has written broadly over thirty years on topics as diverse as income distribution, oil and natural resource use, econometric models, finance and financial markets, inflation, and unemployment. This two volume work contains most of Davidsons professional journal articles, a number of previously unpublished papers, and a sample of his policy oriented testimonies before Congress, the Federal Communications Commission and bank regulators. The topics addressed in this collection among others are: monetary theory and policy; employment theory; and income distribution and inflation.
