

Mri of the Brain III: Neoplastic Disease (Raven Mri Teaching File) (v. 3)

The ten-volume Raven MRI Teaching File presents 1000 case studies and nearly 8000 MR images of neoplastic, non-neoplastic, degenerative, inflammatory, congenital and acquired diseases of the brain, head and neck, spine, musculoskeletal system, cardiovascular system, chest, abdomen and male and female pelvis. Each large-size volume contains 100 completed case studies, each two to four pages in length and illustrated with high-resolution MR images selected on the basis of clinical utility and relevance. The text that accompanies each case study and set of images provides information on clinical history, enhancement agents, and diagnosis and explains how the diagnosis was reached.
