

Orchids of Papua New Guinea

Stretching from the eastern half of the island of New Guinea to many islands of the neighboring archipelago, Papua New Guinea is an orchid wonderland. Its many variations of climate and habitat support a diverse orchid population, including a large number of species of *Dendrobium*, but also epiphytic and terrestrial orchids from a wide range of groups within the orchid family. This introduction will be welcome to the thousands of growers who are discovering the beauty of these orchids.
