

Papers of James Madison: Vol. 11 - 7 March 1788-1 March 1789

The Papers of James Madison project, housed at the University of Virginia, was established in 1956 to publish annotated volumes of the correspondence and writings of James Madison, the Virginia statesman most often remembered for his public service as Father of the Constitution and as fourth president of the United States. The published volumes provide accurate texts of Madison's incoming and outgoing correspondence, informative notes on textual and subject matters, and comprehensive indexes. They are incomparably rich sources for students of Madison's life and valuable research tools for those interested in the general history of the period in which Madison lived (1751-1836). The project has collected more than 27,000 copies of documents related to Madison's life, including letters, essays, notes, diaries, account books, ledgers, wills, legal papers, and inventories. The project serves the public by translating into print these decaying and often nearly illegible manuscripts, thereby preserving them for future generations and making them easier to use. The published volumes also make the contents of Madison-related documents—the originals of which are housed in some 250 archives worldwide—easily accessible to libraries and interested individuals anywhere books travel. The Congressional Series (seventeen volumes) is devoted to the years 1751 to 1801, containing the fullest possible record of Madison's contributions to the creation of the federal government, including his service in the Continental Congress, the Virginia General Assembly, the Constitutional Convention of 1787, the Virginia Ratifying Convention of 1788, and the first four Federal Congresses.
