

The Near-Death Experiences of Hospitalized Intensive Care Patients: A Five Year Clinical Study

Near-death experiences are usually reduced to mere anecdotal evidence, but this book attempts to produce an objective account of these experiences within the UK hospital system. Sartori, an Intensive Therapy Unit nurse in Wales, avoids metaphysical explanations and sticks to the facts of each case, drawing parallels and consistencies in each experience. While heavy on statistical data, this book should appeal to anyone with an interest in near-death experiences.
