

## Hidden Chakra Powers (Book 1) - The Whole Picture

The real secret of the chakras powers is their holistic nature. They are a rainbow of colours and make up the whole picture of existence, and all the energy vibrations that create our world. This book looks at this whole picture, and why we fail to see it. Introducing an holistic approach to how we experience things can have a magical and transformational effect; it can liberate us from closed, outmoded and conditioned ways of thinking. A new way to process information is to understand how you can fill the gaps i.e. what you dont know, with false information, and how that can colour your world and your future experiences. Viv Rosser draws on all her experience as a developmental and cognitive psychology, a gestalt therapist, and an illustrative artist, to create a book that offers you a new way of seeing...holistically. This book is made for kindle-fire and although readable in black and white, will lose the value of the colours in the mandalas, so why not download the kindle fire app on your PC or tablet and take a look at the glowing illustrations and mandala that accompany the information in this book.
