

All you need to know...about Tinnitus

Tinnitus is described as the ?perception of noise in the ears or head without there being an outside source.? Tinnitus causes a great deal of anxiety and stress to the sufferer. It can affect people of any age and can take several different forms. The causes of Tinnitus are not widely known and may think that there is no way of managing the condition. This books seeks to explain to the lay person what the condition is, its causes and how it manifests itself and how it can be managed. The book also seeks to reassure sufferers that if they seek help they will find there are successful ways in which their Tinnitus may be managed.
