

The Ultimate House Book: For Home Design in the Twenty-First Century

Three years into the new millennium, Sir Terence Conran has once again reinvented his concept of home design, now a harmonious blur between public and private living with a soupcon of professionalism. The Conran movement (stores and style) began in 1974 with *The House Book* and was updated as *The New House Book* in 1985 and *The Essential House Book* in 1994. The significance of the newly added word *home* in the title should not be overlooked, as the author has gravitated toward LeCorbusier's 1927 statement: Everybody, quite rightly, dreams of sheltering himself in a sure and permanent home of his own. *Ultimate* appeals to this primal notion of belonging, starting with an aspirational, visual introduction before separating ideas into three distinct sections: home life, or the different stages of design, from first house to empty nest; home work, exploring all options for decorating, from paint versus plaster to remodeling versus new construction; and compendium, the nitty-gritty information so necessary to understanding and making design choices. A feat worthy of any bookshelf. Barbara Jacobs Copyright American Library Association. All rights reserved
