

## Key Skill Outcomes in Science

Key Skill Outcomes in Science has been written for students to consolidate essential science skills. The text guides the reader towards appropriate outcomes in: using tables; observing and hypothesising; problem solving; analysing and designing inferring, predicting and concluding. The material is sequenced according to the level of difficulty. Basic processes, in which many of the fundamental skills of science are found, are presented first. More difficult processes are presented later. Chapter contain a range of skills-based assignments which cover a variety of subject matter.
