

Is Your Child Dying to Be Thin?: A Workbook for Parents and Family Member on Eating Disorders

Is Your Child Dying to Be Thin is a workbook for parents and family members on eating disorders. This title is used in the treatment plans of the Massachusetts Eating Disorder Association and is recommended and sold by Gurze Books and Nutritional Counseling and Education Services, Inc., both of which review and distribute new books on nutrition and eating disorders for the health care profession and educational institutions. Laura J. Goodman, M.Ed., is a psychotherapist specializing in the treatment of eating disorders. Eating disorders, once thought to be a white, upper-middle-class female problem, have now spread across gender, race, and socio-economic lines. The causes are varied and complex; the symptoms are frustrating for the patient and those around him or her; the physical effects are serious, even deadly; and treatment is often complex. Because of this, parents and other family members are often left feeling guilty, angry, powerless, and confused.
